

# Vault Config File Flowchart

Vault binary is named `"safe_vault"` (with `".exe"` suffix on Windows).

Vault's own config file is named `"safe_vault.config"`.

Vault's Crust config file is named `"safe_vault.crust.config"`.

Vault's bootstrap cache file is named `"safe_vault.bootstrap.cache"`.

Vault binary location is:

- On Windows by default `"%ProgramFiles%\safe_vault\"` (e.g. `"C:\Program Files\safv_vault\"`). The actual path can be changed during install.
- On OS X and Linux `"/usr/bin/"`. The path cannot be changed.

An app support dir available for the current user is:

- On Windows `"%APPDATA%\safe_vault\"` (e.g. `"C:\Users\Fraser\AppData\Roaming\safv_vault\"`).
- On OS X and Linux `"$HOME/.config/safe_vault/"`.

A system cache dir available for all users is:

- On Windows `"%ALLUSERSPROFILE%\safe_vault\"` (e.g. `"C:\ProgramData\safv_vault\"`).
- On OS X and Linux `"/var/cache/safe_vault/"`.
